Description			
<p>After a perod of time I am always disconnected from google xmpp server. I have to manually quit my application and restart it to reconnect. When trying to start connection again, it's blocked. Here is a traceback:</p>			
<pre>~/bin/termijab.py in process(self) [14/3200] 506 callback = lambda _: self.connected_event.set() 507 self.add_event_handler('session_start', callback) --> 508 self.loop.run_until_complete(self.connected_event.wait()) 509 def process_thread(): 510 while not self.quit: /usr/lib64/python3.7/asyncio/base_events.py in run_until_complete(self, future) 558 future.add_done_callback(_run_until_complete_cb) 559 try: --> 560 self.run_forever() 561 except: 562 if new_task and future.done() and not future.cancelled(): /usr/lib64/python3.7/asyncio/base_events.py in run_forever(self) 526 events._set_running_loop(self) 527 while True: --> 528 self._run_once() 529 if self._stopping: 530 break /usr/lib64/python3.7/asyncio/base_events.py in _run_once(self) 1726 timeout * 1e3, dt * 1e3) 1727 else: -> 1728 event_list = self._selector.select(timeout) 1729 self._process_events(event_list) 1730 /usr/lib64/python3.7/selectors.py in select(self, timeout) 466 ready = [] 467 try: --> 468 fd_event_list = self._selector.poll(timeout, max_ev) 469 except InterruptedError: 470 return ready</pre>			
<p>Looks like there is some problem with disconnect, also when trying to disconnect multiple times, it's still freeze my app.</p>			
<p>And also an automatic reconnect would be nice.</p>
